I respectfully urge the FCC to REJECT the NAB's petition 04-160 that limits XM's ability to provide me with locally oriented content which includes XM Instant Traffic & Weather. I DO use XM Traffic & Weather quite frequently, especially Traffic. XM Traffic in my area is quite useful and has been very accurate with regards to accidents and regular traffic patterns on all the roads. XM Radio in general has been very enjoyable with their music stations also, since I hear many, many tunes I've never heard before. That is something that the "free" stations do not provide. They play the same tunes every 2-4 hours, so therefore they get really boring.

If the large radio and television stations want to keep their audience base then maybe they should rethink how they do their programming and not attempt to limit my choice to listen to what I want. In our household, with regards to TV we rarely watch the large TV stations. And, we listen to XM Radio in our home AND in our car.
